Cal OES COASTAL REGION

Roadway Damage due to Winter Storms, Humboldt County

On 12/19/16 at 1712 hours the California State Warning Center (CSWC) received a Proclamation from Humboldt County declaring a local emergency due to damage to roadways caused by recent storms and flooding. There are approximately 6 roads in the area that have either sustained damage or are in danger of sustaining damage due to landslides caused by recent winter storms to include California Disaster Assistance Act (CDAA).

- Humboldt County has requested all available recovery assistance from the State and Federal Government.
- The Cal OES Fire Duty Officer (FDO) and Cal OES Coastal Region Duty Officer (CDO) are in contact with Humboldt County and providing updates as they become available.
- On 12/21/16, Board of Supervisors (BOS) Minute Orders and a CDAA Request Letter was received for the Proclamation from Humboldt County for storm damages.

WEATHER OF CONCERN

Weather of Concern

- The potential for brief heavy downpours will bring the threat of mud and debris flows in recent burn areas, prompting the issuance of a Flash Flood Watch. Other potential impacts include the possibility of urban and small stream flooding as well as downed trees.
- **Active Weather Warnings, Watches and Advisories by County:**

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Exiting low pressure with diminishing mountain showers this morning will bring cold overnight temperatures the next couple nights. A weak trough will move into the northern area with a chance of showers Tuesday then ridging builds with morning Valley fog. The main frontal band has moved through leaving only a few showers over the Sierra under a post-frontal wave. The winter weather advisory for snow over the Sierra was extended through 1000 hours due to lingering showers. Otherwise, most of the forecast area is mostly clear. Today through Monday, high afternoon Valley temperatures will only climb into the upper 40s. Morning lows Sunday and Monday will be cold, down to the upper 20s to low 30s in the Valley and teen and single digits in the mountains.

SOUTHERN CALIFORNIA

A cold low pressure system continues to move through Southern California early this morning. The cold frontal precipitation band continues to move through Southern California and should mostly clear far southwestern California by around daybreak. Satellite imagery shows an expansive area of cold air cumulus extending well off the entire California Coast. Periods of showers will continue today especially near the mountains decreasing and ending from the northwest late tonight. Recent webcams from the Crestline show slushy snow accumulations down to around 5000 feet. One spotter report from Wrightwood reported 6 inches of snowfall at 6100 feet through midnight. Snow levels near 4500 feet early this morning will lower to 3000 to 3500 feet this afternoon and 2500 to 3000 feet tonight.
